

Recordall® Turbo Series Meters

Industrial Strength Performance

For Commercial and Industrial Applications

Badger® Recordall® Turbo Series Meters are the smart choice for larger facilities, including hotels, commercial and industrial buildings, manufacturing and processing plants, irrigation centers, and refining operations. Our Turbo's no-nonsense performance will reduce your day-to-day maintenance and replacement costs, while capturing every billable penny through greater accuracy and efficiency.

Badger has extended its family to include a line exclusively for the dependable and accurate measurement of non-potable reclaimed water.

Turbo Series Meters

- Innovative Floating Rotor Design – Eliminates bearing wear and friction between moving parts, providing reduced life cycle costs, and longer performance life.
- Extended Flow Range – Accuracy in a wide flow range from 2-1/2 to 19,800 GPM.
- Lower Pressure Loss for improved system efficiency.
- NSF listed meters available in 1-1/2" to 10" sizes.
- Compatible with all Badger meter reading systems offered, as well as other approved technologies.
